Continuation of Substance of Interview including description of the general nature of what was discussed: the examiner indicated that claims 23-47, being restrictable, read on Snow's prior art, and therefore are not allowed. Claims 1-22 would be allowable if the independent claims 1 and 22 recited the limitations that the conducting material is metal and that the replaceable chemical groups are bound to the metal material in order to overcome potential rejection over the prior art disclosing pH meters with exchangeable ion membranes. The applicant agreed with the examiner's suggestions, with the limitations to be incorporated into claims by the examiner's amendment. Claims 23-47 are cancelled without prejudice. This places the case into the status for allowance.
